

1. Create a new text file

```
<html>
<head>
    <title>Mission: Ocean Cleanup</title>
</head>
<body>
    <div id="wrapper">
        <header>
            <h1>Mission: Ocean Cleanup</h1>
            <ul>
                <li>Home</li>
                <li>History</li>
                <li>Mission</li>
            </ul>
        </header>
        <h1>Page Title</h1>
        <p>Content Here</p>
        <footer>
            <p>Made by Zak, Elliot and Benji</p>
        </footer>
    </div> (end wrapper div)
</body>
</html>
```

2. SAVE AS index.html

Mission: Ocean Cleanup

- Home
- History
- Mission

Page Title

Content Here

Made by Zak, Elliot and Benji

3. Create a new text file

```
body {  
color: white;  
font-family: "Arial", sans-serif;  
margin: 0;  
}
```

```
#wrapper {  
width: 1000px;  
margin: 0 auto; (this centres it on the page)  
background-color: #252B3C;  
padding: 10px;  
}
```

```
header {  
text-align: center;  
}
```

```
footer {  
background: #64BDC4;  
text-align: center;  
border-radius: 20px; (curved edges)  
}
```

```
footer p {  
color: #252B3C;  
padding: 10px;  
}
```

4. SAVE AS style.css

5. Open index.html and link CSS

```
<head>
  <title>Mission: Ocean Cleanup</title>
  <link rel="stylesheet" href="style.css"/>
</head>
```

6. Replace H1 with logo in html

```
<header>
  
  <h1>Mission: Ocean Cleanup</h1>
  <ul>
```

7. Set logo width in CSS

```
header img {
  width: 600px;
}
```

8. Open index.html and create links for menu

```
<ul>
  <li><a href="index.html">Home</a></li>
  <li><a href="history.html">History</a></li>
  <li><a href="mission.html">Mission</a></li>
</ul>
```

9. Style links in CSS

```
header ul {
list-style: none; (removes bullet points)
}
```

```
header li {
display: inline-block; (puts links beside each other)
padding: 0px; (removes bullet point gap)
}
```

```
header a {
display: block; (whole block becomes the link)
width: 200px;
margin: 0 5px;
background: #64BDC4;
padding: 10px;
border-radius: 20px; (curved edges)
color: #252B3C;
text-decoration: none; (removes link underline)
}
```

10. Copy index.html twice and save as history.html and mission.html

11. Add an 'active' id to each of the three pages

Home
(same on history.html and mission.html)

12. Style active and hover links in CSS

```
a#active {  
background: #68f58b;  
}
```

```
header a:hover {  
background: white;  
transition: background 0.7s; (smooth fade on hover)  
}
```

13. Add background video on all three pages

```
<body>  
<video autoplay muted loop id="background">  
<source src="videos/ocean.mp4" type="video/mp4">  
</video>  
<div id="wrapper">  
(same on index.html, history.html and mission.html)
```

14. Edit CSS for background video

```
video#background {  
    object-fit: cover; (fills the page)  
    width: 100%;  
    height: 100%;  
    position: fixed;  
}
```

```
#wrapper {  
    position: relative;  
    width: 1000px;  
...  
}
```
